Company Profile

RedEye is a NJ-based technology setup and IT support services company that offers a complete range of technology implementation solutions. We are differentiated by the consistently high levels of rapid response to the IT needs of our small and medium-size business clients. You benefit from our commitment to respond better and faster than our competitors.

We are driven by a relentless focus on effective support. In fact, it's because of this intense support philosophy that we named our company RedEye. Founded by a team of IT professionals who saw strength in pooling their talents to benefit their growing client base, RedEye's premium service model has allowed us to provide the utmost in professional IT support to all clients of all sizes.
